4704 Wood Road, Monroeville, OH 44847
(419) 359-1501

12/1/17

GENUITY® ROUNDUP READY 2 YIELD® SOYBEANS We have a total of three proven varieties in a range from 2.6 to 3.1 RM. We are seeing 5-6 bu better yields over comparable first generation beans. These can be treated with Acceleron® Seed Treatment.

ROUNDUP READY 2 XTEND® SOYBEANS This new technology will provide dicamba and glyphosate resistance and is built upon the high yielding Genuity® Roundup Ready 2 Yield® trait. We have added two new varieties and offer a range from 2.6 to 3.3 RM. See page 8 for more details on variety characteristics. All can be treated with Acceleron® Seed Treatment.

GLYPHOSATE TOLERANT SOYBEANS Descriptions of three varieties are enclosed. We continue to offer 3106GT and 2914GT. All varieties can be treated with Acceleron® Seed Treatment.

LIBERTY LINK® SOYBEANS Descriptions of two varieties are enclosed including the popular 3015LL. Both varieties can be treated with Acceleron® Seed Treatment.

CERTIFIED SUMMIT, WYANDOT, and STREETER SOYBEANS are available and descriptions are enclosed.

ACCELERON® TREATMENT This seed treatment is offered on all varieties of soybeans. It offers protection for both pathogens and insects. More information enclosed. This treatment is an additional \$10.75/unit which must be prepaid and is NOT returnable.

Tillage Parts - The next shipment order deadline is December 29, 2017 on Wiese tillage parts. Some Current Prices*

Wensink Premium Seed Corn

“All the Performance at Half the Price”

2018 Early Order Seed Corn Program

Early Order Seed Corn Program has begun and will end January 3, 2018. Most pricing is the same as 2017. We have two new hybrids this year, a new 106 day conventional with outstanding yields and a 106 day SmartStax variety. See chart below and enclosed hybrid descriptions. These are some exciting new hybrids that have top end yield potential across a wide range of conditions. Some varieties will be limited, so order early for best selection. All orders will be filled on a first placed, first filled system.

We are now offering an **early order discount of \$39.00 off per unit** from the in-season list price. There is also an **early pay discount of \$2.00 per unit** for payment by January 16, 2018, and **up to \$7.00 per unit volume discount**.

Units	Discounts			YOUR COST* TRADITIONAL VARIETY	
	Volume	Early	Early	Order by 1/3/2018	
		Order	Pay	Pay on Pickup*	1/16/2018
1 - 24	-	\$39.00	\$2.00	\$74.00	\$72.00
25 - 49	\$2.00	\$39.00	\$2.00	\$72.00	\$70.00
50 - 99	\$4.00	\$39.00	\$2.00	\$70.00	\$68.00
100 - 149	\$5.00	\$39.00	\$2.00	\$69.00	\$67.00
150 - 199	\$6.00	\$39.00	\$2.00	\$68.00	\$66.00
200 +	\$7.00	\$39.00	\$2.00	\$67.00	\$65.00

Order early for best seed size and variety selection. If you have questions, give us a call at (419) 359-1501.

Pickup Date: March 20, 2018. All hybrids have 80,000 kernels per unit.

*Prices are subject to change and hybrid selection is dependent upon availability, so order early for best selection. Above price is for SX-630. Due to additional royalty fees, add \$5.00/unit for SX-601, add \$15.00/unit for SX-534, add \$20.00/unit for SX-165, add \$21.00/unit for SX-236, SX-575, and SX-596 to the price above. All remaining hybrid prices include cost of traits, see Quick Fact page for pricing. Untreated corn is available for an extra \$7.50 per unit prepaid and must be ordered by 1/3/2018

Any corn not picked up by May 1, 2018, even if it is paid for, may be put back into inventory and made available for sale.

SmartStax® RIB Complete® Corn Blend - This technology provides control of the absolute broadest spectrum of above and below ground insects and herbicide tolerance (Roundup Ready® and LibertyLink®). These hybrids come treated with the Acceleron® Seed Treatment. Refuge-In-Bag makes planting simple and convenient with no separate structured refuge required. This is the most advanced trait platform delivering all-in-one crop protection. The **SX-558RR SMARTSTAX RIB**, a 106 day powerhouse has new genetics and super yields in corn back to corn situations.

VT Double Pro® RIB Complete® Corn Blend - This provides protection from above ground insects and is Roundup Ready®. Above ground insects include Corn Ear Worm, Fall Army Worm, European and Southwestern Corn Borer. These hybrids come treated with Acceleron® Seed Treatment. Refuge-In-Bag makes planting simple and convenient with no separate structured refuge required. We are offering four hybrids at this time: The **SX-317RR VT2PRO RIB** a 102 day short season hybrid, **SX-526RR VT2PRO RIB** a 105 day workhorse, **SX-557RR VT2PRO RIB** a 106 day power house, and **SX-573RR VT2PRO RIB** a 107 day proven performer with top yields.

Poncho® 250 for \$10.50 Program - BACK BY POPULAR DEMAND!! If you order your seed corn treated with Poncho® 250, before the early order deadline of 1-3-2018, it will cost only \$10.50 per unit. **This is a savings of \$10.00 off the list price.** Poncho® treatments offer excellent insect control and convenience with no liquids to mix and no insecticide hoppers to fill or load. Poncho® 250 offers early season protection against Black Cutworms, Wireworms, White Grubs, Seed Corn Maggots, Grape Colaspis, Flea Beetles, Chinch Bugs, and other early-season pests. The cost is \$20.50 per unit after the early order deadline of 1-3-2018, if still available.

2018 PREMIUM SEED CORN

CONVENTIONAL HYBRIDS

SX-165

- RM 95-96 day
- Medium-tall dual purpose grain or silage hybrid
- Strong agronomics
- Healthy plant with very good late-season intactness
- Flex-ear style with average grain quality
- Outstanding yield potential for maturity
- Widely adapted across soil types

SX-236

- RM 101-102 day
- High yield potential and test weight
- Very good stalks & roots which extend harvest window
- Excellent fall appearance with open husks
- Semi-determinate ear with very consistent development
- Strong performance across all yield levels and soil types with medium to high populations (28-36,000)

SX-534

- RM 105 day
- Outstanding top end yield potential
- Solid agronomics allows southern movement
- Good late season intactness
- Consistent girthy ears with deep kernels
- Very good seedling vigor, works well in no-till and conventional situations
- Medium-tall hybrid with medium ear placement

SX-568

- RM 106 day
- Widely adapted hybrid
- Excels in all crop rotations
- Works in all soil types from high fertility to wetter clays
- Medium-tall plant with semi-determinate ear and very good test weight
- Good potential as a dual purpose hybrid

NEW

SX-575

- RM 107 day
- Medium-full season maturity with super yield potential
- Very good seedling vigor and early season growth for both conventional and no-till
- Medium plant height
- Excellent roots and very good stalks
- Appealing fall appearance and intactness
- Semi-flex, girthy ear with consistent ear height and size within row

SX-596

- RM 109 day
- Strong emergence and fast early season growth for both conventional and no-till
- Medium plant height
- Excellent roots and very good stalks
- Very showy plant with very good fall intactness
- Semi-determinate, long slender ears with some flex and average grain quality
- Medium-full season maturity with very consistent yield potential

SX-601

- RM 107-109 day
- Outstanding yield potential
- Excellent eye appeal
- Excellent seedling vigor and early growth for both conventional and no-till situations
- Wide adaptability allows greater planting flexibility
- Good general disease tolerance
- Large girthy ears, with better test weight and grain quality

SX-630

- RM 109-110 day
- Improvement on SX-635A
- Shows impressive early growth
- Strong stalk & roots
- Excellent conventional or no-till choice
- Large girthy ears
- Good dry down and staygreen
- Adapts well to various soil types, and excels with high management

Most hybrids can be treated with Poncho® 250. See page 1 for details.

- Provides seed and seedling protection against all seven major early corn insect pests, up to the 5-leaf stage.
- Contact and systemic activity is a highly effective broad-spectrum insect control.

Always read and follow label directions.

2018 PREMIUM SEED CORN

VT Double Pro[®] RIB Complete[®] Corn Blend Hybrids

All VT Double Pro[®] RIB Complete[®] Corn Blend Hybrids feature:

- Roundup Ready[®] 2 Technology
- VT Double Pro[®] gives you Roundup Ready[®] flexibility and protection from above ground insects, including Corn Ear Worm, Fall Army Worm, European and SW Corn Borer
- Refuge-In-Bag (RIB) makes refuges simple and convenient
- All hybrids come treated with Acceleron[®]

SX-317RR VT2PRO RIB

- RM 101-102 day
- **Roundup Ready[®] 2 Technology**
- High yield potential and test weight
- Very good stalks and roots which can extend harvest window
- Excellent fall appearance with open husks
- Semi-determinate ear with very consistent development
- Strong performance across all yield levels and soil types with medium to high populations (28-36,000)

SX-526RR VT2PRO RIB

- RM 105 day
- **Roundup Ready[®] 2 Technology**
- Excellent yield potential with fast dry down
- Medium-tall hybrid with good stalk and superior root strength
- Consistent semi-determinant ears (16-18 kernel rows) with some ear flex, and excellent test weight
- Healthy plant with very good disease ratings and good leaf disease tolerance
- Performs well on heavy soils and fields with limited drainage

SX-557 RR VT2PRO RIB

- RM 106 day
- **Roundup Ready[®] 2 Technology**
- Widely adapted variety
- Excels in all crop rotations
- Works in all soil types from high fertility to wet clay conditions
- Medium-tall plant with semi-determinate ear and very good test weight
- Good potential as a dual purpose hybrid

SX-573RR VT2PRO RIB

- RM 107-109 day
- **Roundup Ready[®] 2 Technology**
- Medium-full season maturity with super yield potential
- Very good seedling vigor and early season growth for both conventional and no-till
- Medium plant height
- Excellent roots and very good stalks
- Appealing fall appearance and intactness
- Semi-flex, girthy ear with consistent ear height and size within row

2018 PREMIUM SEED CORN

- All SmartStax® RIB Complete® Corn Blend hybrids feature:
- **Roundup Ready® 2 Technology**
 - LibertyLink® herbicide resistance
 - Refuge-In-Bag (RIB) solution with 5% refuge, more high yielding corn per acre
 - RIB makes refuges simple and convenient
 - Protection from above ground and below ground insects
 - **Treated with Acceleron®**

SX-558RR STAX RIB

NEW

- RM 106 day
- **Roundup Ready® 2 Technology**
- **LibertyLink® herbicide resistance**
- Widely adapted hybrid
- Excels in all crop rotations
- Works in all soil types from high fertility to wet clay conditions
- Medium-tall plant with semi-determinate ear and very good test weight
- Good potential as a dual purpose hybrid

Roundup Ready® Corn 2

SX-574RR

- RM 107 day
- **Roundup Ready® 2 Technology**
- Medium-full season maturity with super yield potential
- Very good seedling vigor and early season growth for both conventional and no-till
- Medium plant height
- Appealing fall appearance and intactness
- Semi-flex, girthy ear with consistent ear height and size within row
- **Comes treated with Acceleron®**

Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Certain products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. **Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Growers should refer to <http://www.biotechstatus.com/> for any updated information on import country approvals.** Excellence Through Stewardship® is a registered trademark of Biotechnology Industry Organization.

B.t. products may not yet be registered in all states. Check with your Monsanto representative for the registration status in your state.

IMPORTANT IRM INFORMATION: RIB Complete® corn blend products do not require the planting of a structured refuge **except** in the Cotton-Growing Area where corn earworm is a significant pest. SmartStax® RIB Complete® corn blend is not allowed to be sold for planting in the Cotton-Growing Area. **See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.**

ALWAYS READ AND FOLLOW DIRECTIONS FOR USE ON PESTICIDE LABELING. IT IS A VIOLATION OF FEDERAL AND STATE LAW to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with Roundup Ready 2 Xtend® soybeans. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. XTENDIMAX® HERBICIDE WITH VAPORGRIP® TECHNOLOGY AND IN CROP USES MAY NOT BE APPROVED IN ALL

STATES. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend® soybeans.

Roundup Ready 2 Xtend® soybeans contains genes that confer tolerance to glyphosate and dicamba. Glyphosate will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Contact your Monsanto dealer or refer to Monsanto's Technology Use Guide for recommended weed control program.

Roundup Ready® technology contains genes that confer tolerance to glyphosate, an active ingredient in Roundup® brand agricultural herbicides. Agricultural herbicides containing glyphosate will kill crops that are not tolerant to glyphosate.

Acceleron®, Genuity®, RIB Complete and Design®, RIB Complete®, Roundup Ready 2 Technology and Design®, Roundup Ready®, Roundup®, SmartStax and Design®, SmartStax®, and VT Double PRO®, Roundup Ready 2 Xtend®, Roundup Ready 2 Yield®, VaporGrip®, and XtendiMax® are trademarks of Monsanto Technology LLC. LibertyLink® and the Water Droplet Design® are registered trademarks of Bayer. Herculex® is a registered trademark of Dow AgroSciences LLC. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association. All other trademarks are the property of their respective owners.

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, **including applicable refuge requirements for insect resistance management**, for the biotechnology traits expressed in the seed as set forth in the Monsanto Technology/Stewardship Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements.

2017 Conventional Seed Corn Plot Data

Planted 5-16-17, Harvested 10-20-17, Monroeville, Ohio

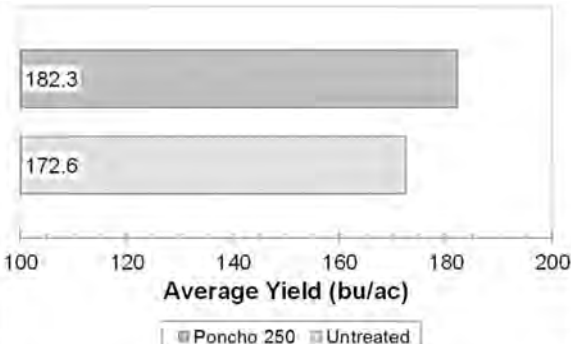

Poncho 250

- Covers all seven major early corn insect pests, up to the 5-leaf stage.
- Provides seed and seedling protection.
- Contact and systemic activity offers highly effective, broad-spectrum insect control.

Yields 9.7* bu./ac. more than seed not treated with an insecticide

Always read and follow label directions. Poncho® is a registered trademark of Bayer.

*Based on 526 side-by-side field trials comparing the performance of Poncho 250 treated seed to seed not treated with an insecticide (2003-2012).

2018 Roundup Ready 2 Xtend[®] Soybean Varieties

Roundup Ready 2 Xtend[®] Soybean Varieties feature these benefits:

- Provide tolerance to dicamba and glyphosate
- Are built on the high-yielding Genuity[®] Roundup Ready 2 Yield[®] trait

New!

2618RR2X

- 2.6 RM
- Strong emergence with excellent early vigor
- Tall variety with very good lodging score
- Dual phytophyra genes with Rps1c and 3a and outstanding tolerance
- Excellent defensive package for Ohio
- Super yields!

New!

2918RR2X

- 2.9
- Well adapted to all row widths (7.5"-30") and excels in narrow rows
- Medium tall plant with excellent lodging score
- Has the complete package for phytopheria (Rps1c gene with excellent tolerance), Sudden Death and Brown Stem Rot
- Very "showy" clean looking variety
- Outstanding yields, hard to beat!

3016RR2X

- 3.0 RM
- At the top of yield trials across country with super Eastern yields
- Excellent upright intermediate branching plant type works well in all row widths
- Very good field tolerance to phytophthora root rot with Rps 1C gene
- Very reliable defensive disease package with Cyst Nematode resistance

3317RR2X

- 3.3 RM
- Medium-tall plant height with super podding potential
- Intermediate plant type with moderate side branching 20" row or less
- Yield potential of 3.5+ RM beans in an earlier maturity
- Rps 1C gene, outstanding field tolerance, with cyst resistance

2018 Genuity[®] Roundup Ready 2 Yield[®] Soybean Varieties

2612RR2Y

- 2.6 RM
- Excellent stress tolerance
- Works well in no-till
- Excellent disease scores
- Tall plant height with impressive podding
- Rps 1C gene & SCN P188-788
- Great defensive package

3116RR2Y

- 3.1 RM
- Outstanding yield performance in Ohio trials
- Taller Intermediate Bush type plant
- Solid defensive bean, Rps 1K and very good phytophthora along with Cyst Nematode protection
- Excellent emergence and early seedling vigor makes it a great no-till, minimum till choice

2915RR2Y

- 2.9 RM
- Offensive yield with tough, durable stress tolerance
- Nice defensive package: Brown Stem Rot, Cyst Nematode and phytophthora RPS 1a with good field tolerance
- Medium-tall plant height
- Dark green during the growing season and nice blonde color at harvest

2018 LibertyLink® Soybean Varieties

2617LL

- 2.6 RM
- Incorporates high yields with solid defense
- Medium-tall, bushy plant type with excellent standability
- Terrific health which stands out all season
- Consistent across the state
- Works in all soil types
- Rps 1c gene for Phytophthora with good field tolerance

3015LL

- 3.0 RM
- Outstanding yield potential
- Excellent emergence and good early vigor
- Medium-tall plant height that works well in all row widths
- Very good disease package: White Mold, Sudden Death and Cyst Nematode
- Rps 1c gene for Phytophthora with good field tolerance

2018 Glyphosate Tolerant Soybean Varieties

2900GT

- 2.9 RM
- Rps 1K Phytophthora resistance
- Medium plant height, good for all row widths
- Good White Mold and Brown Stem Rot resistance
- Consistent work horse yielder, super yield potential

2914GT

- 2.9 RM
- Excellent tolerance to Phytophthora root rot & contains Rps 1K gene
- Very good emergence and stress tolerance with a good disease package
- Tall plant height with excellent standability works well in all row widths

3106GT

- 3.1RM
- Tall plant type with excellent standability
- Excellent tolerance to Phytophthora root rot, contains Rps 1C
- Excellent seedling vigor for minimum till and no-till situations
- Works well in all row widths
- Handles heavy wet soil conditions

2018 Conventional Soybean Varieties

SUMMIT

- 2.6 RM
- 2011 release of Ohio State
- Intermediate type plant with high yield potential
- Multiple Rps genes for a high level of partial resistance to Phytophthora
- Purple flowers, light tawny pubescence, tan pods and black hilum

STREETER

- 3.0 RM
- Released by Ohio State in 2008
- Better yielder than Wyandot and Dennison
- Excellent lodging resistance
- White flowers, light tawny pubescence, and tan pods
- Carries Rps 1c and Rps 3a Phytophthora resistance
- Highest mean yielder in OSU 2011-2012 performance trials for North Region

WYANDOT 14

- 2.9 RM
- Seed size, protein and oil content greater than Wyandot
- 2012 release of The Ohio State University
- Resistant to soybean aphids (Rag 2 Gene) and powdery mildew.
- Intermediate type plant
- Very good yield potential with good yield record
- Acceptable for the soy food market because of the lack of hilum pigments
- Resistance to Phytophthora with the Rps3a gene
- White flowers, gray pubescence, brown pods and yellow (clear) hila
- Superior or equal agronomic attributes to Wyandot

The LibertyLink® trait with Liberty® herbicide provides excellent weed control and preserves the yield potential of high-performing varieties. Soybeans with the LibertyLink trait allow growers to spray Liberty in-crop for nonselective post emergence control of even the toughest weeds, including Palmer amaranth, giant ragweed, waterhemp and marehail. Liberty works fast, controlling weeds within days versus weeks, before they jeopardize yield potential. Liberty is a group 10 herbicide mode of action.*

*Herbicide mode of action groups designated by the Weed Science Society of America.

Bayer Crop Science LP, 2 T.W. Alexander Drive, Research Triangle Park, NC 27709. Always read and follow label instructions. For additional product information call toll-free 1-866-99-BAYER (1-866-992-2937) or visit our website at www.BayerCropScience.us.

Soybean seeds containing LibertyLink® are protected under multiple U.S. patents and may be planted only to produce one (1) commercial crop, and only after signing a Bayer Grower Technology Agreement. It is illegal to save or catch soybean seeds containing the LibertyLink trait for use as planting seed or for transfer to others for use as planting seed.

1=Best 5=Worst

Wensink Farm Seeds has a **"No Saved Seed" Policy** for any seed containing a patented trait. Seeds containing the Genuity® Roundup Ready 2 Yield® trait or the Roundup Ready 2 Xtend® trait are protected under numerous U.S. patents. Seed containing patented traits, such as seed containing Roundup Ready 2 Yield® or the Roundup Ready 2 Xtend® traits, can only be used to plant a single commercial crop. It is unlawful to save and replant Genuity® Roundup Ready 2 Yield® or the Roundup Ready 2 Xtend® soybeans. Additional information and limitations on these products are provided in the Monsanto Technology Stewardship Agreement and the Monsanto Technology Use Guide. The licensed U.S. patents for Monsanto technologies can be found at the following webpage: www.monsantotechnology.com.

Benefits of New Seed:

- Highest quality and highest yield vs. bin-run
- Access to most elite germplasm with the highest yielding technology available
- Reliable germination
- Average loss of ~10-15% cleanout at harvest for bin-run seed
- Bin run planting rates are generally 15% higher than new branded seed
- Dealer agronomic support before and after the sale
- Stronger intellectual property rights in the seed sector are associated with higher yield growth
- Many varieties are still protected under a variety patent and cannot be saved without a license

Genuity® Roundup Ready 2 Yield® and Roundup Ready 2 Xtend® Soybean Plot Yield Data

Planted 5-31-17 Harvested 10-12-17, Monroeville, Ohio

3016RR2X

- 3.0 RM
- At the top of yield trials across country
- Excellent upright intermediate branching plant type works well in all row widths
- Very good field tolerance to phytophthora root rot with Rps 1C gene
- Very reliable defensive disease package with Cyst Nematode resistance

Glyphosate Tolerant Soybean Plot Yield Data

Planted 5-31-17, Harvested 10-13-17, Monroeville, Ohio

3106GT

- 3.1 RM
- Tall plant type with excellent standability
- Excellent tolerance to Phytophthora root rot, contains Rps 1C
- Excellent seedling vigor for minimum till, no-till situations
- Works well in all row widths
- Handles heavy wet conditions
