

WENSINK SEEDS
 4704 Wood Road, Monroeville, OH 44847
 (419) 359-1501

ENLIST E3[®] SOYBEANS This technology with tolerance to 2,4-D choline, glyphosate and Liberty herbicides. This gives you more ways to fight weeds and protect yields in-season. We are offering one new variety this year for a total of seven varieties. Descriptions are enclosed. All can be treated with Eclipse[®] Seed Treatment.

GLYPHOSATE TOLERANT SOYBEANS We continue to offer the 3106GT and its description is enclosed. Can be treated with Eclipse[®] Seed Treatment.

LIBERTYLINK[®] GT27[®] SOYBEANS This exciting trait stack enables the use of Liberty, glyphosate and Alite 27 (a new HPPD Inhibitor) over the top. We are offering three varieties this year. Descriptions of all varieties are enclosed. All can be treated with Eclipse[®] Seed Treatment.

XTENDFLEX[®] SOYBEANS This technology provides dicamba, glyphosate and glufosinate resistance and is built upon the high yielding Roundup Ready 2 Yield[®] trait. We offer one variety this year, a 3.0 RM with variety characteristics enclosed. This can be treated with Eclipse[®] Seed Treatment.

CONVENTIONAL SOYBEANS We have one variety, BUCKEYE, and a description is enclosed.

ECLIPSE US[™] TRIO-R IM 75 SOYBEAN TREATMENT This seed treatment is offered on all varieties of soybeans. It includes three fungicides: Rancona, Thiabendazole, and Mefenoxam along with the insecticide Imidacloprid. This provides protections from both seed and soil-borne pathogens and insects. This treatment is an additional \$8.25/unit which must be prepaid and is NOT returnable. **Must be ordered by 2-24-24.**

Tillage Parts - The next shipment order deadline is January 3, 2025 on Wiese tillage parts. Some Current Prices*

2.5" HD Straight Plow Chisels (20" / 12#)	\$58.19	20" x 7ga Disc Blades	\$42.24 - \$46.95
3" Twisted Plow Chisels (1/2" x 3" x 23")	\$31.41	20"x 11/2"R Soil Saver Coulter Blades (6 ga, 0.197" Thick)	\$45.14

 5# Graphite bucket..... \$14.96
 80/20 talc/graphite (40#)..... \$42.33

* Prices subject to change. Due to shortages all parts are subject to availability. Call for more information and current prices.

Enlist E3[®] Soybeans

With tolerance to 2,4-D choline in Enlist herbicides, glyphosate and glufosinate, Enlist E3[®] soybeans give you more ways to fight weeds and protect yields this season. The Enlist E3 trait stack has the following herbicide tolerances built in: Glyphosate (Roundup[®]), Glufosinate (Liberty[®]), and 2-4-D Choline (Enlist One[®])

E2623E3

- 2.6 RM
- Tan/light tawny plant with medium height
- Excellent ability to handle stress and disease issues
- Rps1k gene plus very good field Phytophthora tolerance
- Superior yields in all row widths for its maturity across all environments
- Early maturity allows wheat planting

E2625E3

New!

- 2.6 RM
- Medium-tall height with good standability and intermediate branching for all row widths
- High yielding genetics plot topper at its maturity
- Overall Disease and Phytophthora is excellent
- Very good adaptability to all soil types with good wet feet tolerance
- Early maturity allows wheat planting

E2921E3

- 2.9 RM
- Gray/brown plant with medium height
- Above average standability scores
- Rps 1a with very good Phytophthora tolerance

E2924E3

- 2.9 RM
- Medium Tall gray brown plant with above average lodging
- Excellent Phytophthora field tolerance
- Outstanding yield in heavy Sudden Death Syndrome Areas
- Dominate yield performance for its maturity

E3121E3

- 3.1 RM
- Gray/brown plant with medium-tall height
- Rps 1c with Excellent Phytophthora tolerance
- Outstanding yields, best yielding variety in the 3.1 RM across multiple tests and years

E3124E3

- 3.1 RM
- Medium tall, gray/brown plant with excellent standability
- Increased White Mold protection over older varieties
- Rps1c Phytophthora gene with excellent field tolerance
- Excellent stress tolerance with excellent field emergence

E3424E3

- 3.4 RM
- Outstanding emergence with superior stress tolerance for drought situations
- Defensive package: Rps 1c Phytophthora gene, very good frogeye and SCN
- 4.2 bu increase over 3422E3 in Ohio and Indiana plots!

MULTIPLE HERBICIDE TOLERANCES, EXCELLENT WEED CONTROL

2,4-D choline | Glyphosate | Glufosinate

- Convenient proprietary blend of 2,4-D choline and glyphosate
- The two sites of action work together to deliver control of yield-robbing weeds and help prevent resistance

- Straight-goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with Durango[®] DMA[®] herbicide, Liberty[®] herbicide and other qualified tank-mix products, allowing for a customized weed control program to fit each farm

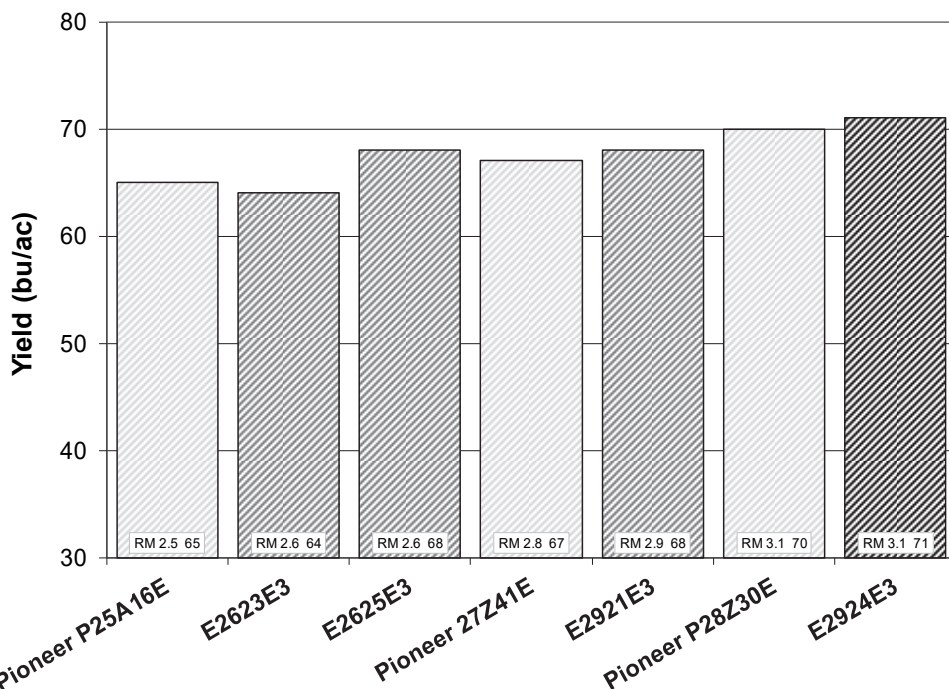

Enlist Duo[®] and Enlist One[®] herbicides with Colex-D[®] technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist E3[®] soybean crops.

On-Target Application

- 90% less drift than traditional 2,4-D
- 96% less volatile than 2,4-D ester

Enlist E3[®] Soybean Plot Data

Planted 5-24-24, Harvested 10-18-24, Monroeville, Ohio

E2924E3

- 2.9 RM
- Enlist E3[®] trait stack allows great herbicide flexibility
- Medium-tall gray/brown plant with above average lodging
- Excellent Phytophthora field tolerance
- Outstanding yield in heavy Sudden Death Syndrome Areas
- Dominate yield performance for its maturity

Enlist E3[®] Soybean Plot Data

Planted 5-24-24, Harvested 10-18-24, Monroeville, Ohio

E3124E3

- 3.1 RM
- Enlist E3[®] trait stack allows great herbicide flexibility
- Medium tall, gray/brown plant with excellent standability
- Increased White Mold protection over older varieties
- Rps1c Phytophthora gene with excellent field tolerance
- Excellent stress tolerance with excellent field emergence

LibertyLink® GT27® Soybeans

Created with high-yielding elite genetics, LibertyLink® GT27® soybeans give growers exceptional performance coupled with outstanding weed control. LibertyLink GT27 soybeans were the first soybean technology enabling Liberty®, glyphosate, and Alite 27 (a new HPPD Inhibitor) use over the top.

2026LLGT

- 2.6 RM
- Early with good yield potential
- Excellent emergence, stress tolerance and vigor
- Medium-tall plant height with light tawny color
- Very good Phytophthora field tolerance
- Very good Sudden Death Syndrome tolerance
- Works well in no-till, reduced till and conventional situations in broad range of soils

2231LLGT

- 3.1 RM
- Top yields across all soil types and tillage applications
- Attractive light tawny, medium-tall plant
- Very good standability
- Rps H1K gene with very good Phytophthora field tolerance

2029LLGT

- 2.9 RM
- Outstanding yield for its maturity
- Attractive light tan plant with good height and standability
- Above average Sudden Death Syndrome scores with Brown Stem Rot resistance
- Excellent Phytophthora resistance
- Moves across various soil types well

LibertyLink GT27 is not tolerant to all HPPD herbicides. Alite™27 herbicide from BASF is the first HPPD herbicide for use on GT27 and LibertyLink GT27 soybeans is currently available in select counties in certain states.

Seeds containing the LibertyLink® trait may be protected under one or more U.S. patents and may be planted only to produce one (1) commercial crop in a single season, and only after signing a BASF Grower Technology Agreement. It is illegal to save seeds containing the LibertyLink trait for use as planting seed or for transfer to others for use as planting seed.

LibertyLink® GT27® soybeans offer triple stack tolerance to Liberty, glyphosate, and, in select counties specified on the label, the first HPPD based herbicide for soybeans—

Alite™ 27. Other HPPD herbicides not labeled for use with LibertyLink GT27 or isoxaflutole-resistant soybeans may cause significant crop injury. Alite 27 herbicide is only available for use in labeled counties.

Always read and follow label directions. Alite 27 is a restricted use herbicide. Alite, Liberty, and LibertyLink are registered trademarks of BASF. GT27 is a registered trademark of M.S. Technologies, L.L.C. MS Technologies is a trademark of M.S. Technologies, L.L.C. ©2020 BASF Corporation / M.S. Technologies, L.L.C. All Rights Reserved. APN 20-INT-0014

Seeds containing the PowerCore® Enlist®, PowerCore® Enlist® Refuge Advanced®, and Enlist® Corn - REFUGE traits are protected under one or more U.S. patents which can be found at: www.traitstewardship.com. The purchase of this traited seed includes a limited license to produce a single crop in the United States. The use of seed from such a crop and/or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Corteva Agriscience Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements.

To plant PowerCore Enlist, PowerCore Enlist Refuge Advanced, and Enlist Corn - REFUGE seed, you must have a limited license from Corteva Agriscience (or other appropriate affiliates). In consideration of the foregoing, Corteva Agriscience grants to the Grower a limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed.

Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3® soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Corteva Agriscience technologies can be found at the following webpage: www.corteva.us/Resources/trait-stewardship.html.

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, Corteva Agriscience's product launch process for responsible launches of new products includes a long-standing process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control

to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com. Excellence Through Stewardship® is a registered trademark of Global Stewardship Group.

Following burndown, Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist® corn and soybeans. Consult Enlist® herbicide labels for weed species controlled. Enlist Duo and Enlist One herbicides are not registered for use or sale in all states and counties; are not registered in AK, CA, CT, HI, ID, MA, ME, MT, NH, NV, OR, RI, UT, VT, WA and WY; and have additional subcounty restrictions in AL, GA, TN and TX, while existing county restrictions still remain in FL. All users must check "Bulletins Live! Two" no earlier than six months before using Enlist One or Enlist Duo. To obtain "Bulletins," consult epa.gov/espp/, call 1-844-447-3813, or email ESPP@epa.gov. You must use the "Bulletin" valid for the month and state and county in which Enlist One or Enlist Duo are being applied. Contact your state pesticide regulatory agency if you have questions about the registration status of Enlist® herbicides in your area. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO USE ANY PESTICIDE PRODUCT OTHER THAN IN ACCORDANCE WITH ITS LABELING. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USE IN THE STATE OF APPLICATION. USE OF PESTICIDE PRODUCTS, INCLUDING, WITHOUT LIMITATION, 2,4-D-CONTAINING PRODUCTS NOT AUTHORIZED FOR USE WITH ENLIST CORN AND SOYBEANS, MAY RESULT IN OFF-TARGET DAMAGE TO SENSITIVE CROPS/AREAS AND/OR SUSCEPTIBLE PLANTS, IN ADDITION TO CIVIL AND/OR CRIMINAL PENALTIES. Additional product-specific stewardship requirements for Enlist crops, including the Enlist Product Use Guide, can be found at www.traitstewardship.com. The transgenic soybean event in Enlist E3® soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies, L.L.C.

™ & ® Trademarks of Corteva Agriscience and its affiliated companies.

XtendFlex® Soybeans

XtendFlex® Soybean Varieties feature these benefits:

- Provide tolerance to dicamba (Xtendimax®), glyphosate (Roundup®), and glufosinate (Liberty®)
- Built on the high-yielding Roundup Ready 2 Yield® trait

3024XF

- 3.0 RM
- Medium-tall height with medium bush and very good standability
- Carries the Rps 1c gene for Phytophthora with above average field tolerance
- Works well in all row widths, excellent no-till choice
- Outstanding emergence and early vigor
- Solid agronomics with good disease ratings
- 2-3 bu yield advantage over 3022XF

Glyphosate Tolerant Soybeans

3106GT

- 3.1RM
- Tall plant type with excellent standability
- Excellent tolerance to Phytophthora root rot, contains Rps 1c
- Excellent seedling vigor for minimum till and no-till situations
- Works well in all row widths
- Handles heavy wet soil conditions

Conventional Soybeans

BUCKEYE

- 3.0 RM
- Outstanding yield potential across all soil types
- Defensive package includes Rps1c with very good field tolerance, good Sudden Death Syndrome tolerance and cyst nematode resistant
- Medium tall plant with very good lodging scores
- Excellent emergence for no-till and minimum till situations

No dicamba may be used in-crop with seed with Roundup Ready® Xtend Technology, unless and until approved or specifically permitted. No dicamba formulations have been registered for such in-crop use at the time this material was published. Please follow <https://www.roundupreadyxtend.com/pages/xtendimax-updates.aspx> for status updates.

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all applicable regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS.

It is a violation of federal and state law to use any pesticide product other than in

accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with Roundup Ready 2 Xtend® soybeans. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex® Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with products with XtendFlex® Technology.

Roundup Ready® 2 Technology contains genes that confer tolerance to glyphosate. Roundup Ready 2 Xtend® soybeans contain genes that confer tolerance to glyphosate and dicamba. Products with XtendFlex® Technology contains genes that confer tolerance to glyphosate, glufosinate and dicamba. Plants that are not tolerant to glyphosate may be damaged or killed if exposed to those herbicides. Plants that are not tolerant to glyphosate, dicamba, and/or glufosinate may be damaged or killed if exposed to those herbicides. Plants that are not tolerant to dicamba may be damaged or killed if exposed to those herbicides. Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weed control programs.

Acceleron®, Roundup Ready 2 Xtend®, Roundup Ready 2 Yield®, Roundup Ready® and XtendFlex® are registered trademarks of Bayer Group. LibertyLink logo® and LibertyLink® are trademarks of BASF Corporation.

WENSINK SEEDS

Your Beans, Your Way

Select the package size that's right for you
All GMO beans sold as a 140,000 seed unit

Bagged: Convenient 1 unit size.

Mini-Bulk Bag: 45 units per bag. Loops on the top with a duffle top and spout on the bottom. Bag does not need to be returned.

Pro-Box: 45 units per box. Bring your box early to have it filled or use ours. Our boxes must be returned.

True Bulk: You bring a truck, wagon or tender and we will fill it. 100 unit minimum. Delivery available BEFORE April 1st.

Wensink Premium Seed Corn

“All the Performance at Half the Price”

2025 Fall Seed Corn Program

Early Order Seed Corn Program has begun and **will end January 3, 2025**. See the chart below and the enclosed hybrid descriptions. These are some exciting hybrids that have top end yield potential across a wide range of conditions. Some varieties are limited, so order early for best selection. All orders will be filled on a first placed, first filled system.

We are now offering an **Early Order Discount of \$79.00 off per unit** from the in-season list price. There is also an **Early Pay Discount of \$2.00 per unit** for payment by January 19, 2025 and **up to \$7.00 per unit Volume Discount**.

Units	Volume	Discounts		YOUR COST* TRADITIONAL VARIETY	
		Early Order	Early Pay	Pay on Pickup*	Pay by 1/19/2025
1 - 24	-	\$79.00	\$2.00	\$94.00	\$92.00
25 - 49	\$2.00	\$79.00	\$2.00	\$92.00	\$90.00
50 - 99	\$4.00	\$79.00	\$2.00	\$90.00	\$88.00
100 - 149	\$5.00	\$79.00	\$2.00	\$89.00	\$87.00
150 - 199	\$6.00	\$79.00	\$2.00	\$88.00	\$86.00
200 +	\$7.00	\$79.00	\$2.00	\$87.00	\$85.00

Order early for best seed size and hybrid selection. If you have questions, give us a call at (419) 359-1501.

Pickup Date: March 2025. All hybrids have 80,000 kernels per unit.

*Prices are subject to change and hybrid selection is dependent upon availability, so order early for best selection.

Above price is for SX-630. See Quick Facts page for pricing for all other varieties.

Untreated corn is available for an extra \$10.00 per unit prepaid and **must be ordered by 12/31/2024**

Any corn not picked up by May 1, 2025, even if it is paid for, may be put back into inventory and made available for sale.

SmartStax® RIB Complete® Corn Blend - This technology provides control of the absolute broadest spectrum of above and below ground insects and herbicide tolerance (Roundup Ready® and LibertyLink®). These hybrids come treated with Acceleron® Seed Treatment. Refuge-In-Bag makes planting simple and convenient with no separate structured refuge required. This is the most advanced trait platform delivering all-in-one crop protection. **SX-584RRSTAX RIB**, a 107 day powerhouse featuring new genetics and super yields in corn back to corn situations.

VT Double Pro® RIB Complete® Corn Blend - This provides protection from above ground insects and is Roundup Ready®. These hybrids come treated with Acceleron® Seed Treatment. Refuge-In-Bag makes planting simple and convenient with no separate structured refuge required. We are offering three hybrids at this time: **SX-319RR VT2PRO RIB** a 102 day short season hybrid, the 107 day **SX-553RR VT2PRO RIB**, and the very popular 109 day plot topper **SX-609RR VT2PRO RIB**.

PowerCore® Enlist® Refuge Advance® Corn Hybrids - This trait stack provides protection from above ground insects and is part of the Enlist® system. This trait stack gives you glyphosate, 2,4-D choline, glufosinate and FOP herbicide tolerance. These hybrids come treated with Acceleron® Seed Treatment and Refuge-In-Bag makes planting simple and convenient. We are offering one hybrid at this time, **SX-454PC ENLIST RIB**, a 105 day maturity hybrid with diverse genetics. We have received many positive comments about this variety.

Poncho® 250 for \$15.50 Program - If you order your seed corn treated with Poncho® 250 before the early order deadline of 1-3-25, it will cost only \$15.50 per unit. This is a saving of \$15.00 off the list price. Poncho treatments offer excellent insect control and convenience with no liquids to mix and no insecticide hoppers to fill. Poncho® 250 offers early season protection against Black Cutworms, Wireworms, White Grubs, Seed Corn Maggots, Grape Colaspis, Flea Beetles, Chinch Bugs, and other early-season pests. The cost is \$30.50 per unit after the early order deadline of 1-3-2025, if still available.

2025 PREMIUM SEED CORN

VT Double Pro® RIB Complete® Corn Blend Hybrids

All VT Double Pro® RIB Complete® Corn Blend Hybrids feature:

- Roundup Ready® 2 Technology
- Roundup Ready® flexibility and protection from above ground insects, including Corn Ear Worm, Fall Army Worm, European and SW Corn Borer
- Refuge-In-Bag (RIB) makes refuges simple and convenient
- **All hybrids come treated with Acceleron®** which includes Poncho for insect protection and four different fungicides to protect against soil and seed-borne diseases

SX-319RR VT2PRO RIB

- RM 101-102 day
- **Roundup Ready® 2 Technology**
- Protection from above ground insects
- Wide adaptability moves across various soils
- Excellent early vigor for minimum tillage and early planting
- Medium-tall plant with very good stalks and roots
- Long ears with good kernel depth with excellent test weight and yield

SX-553RR VT2PRO RIB

- RM 107 day
- **Roundup Ready® 2 Technology**
- Protection from above ground insects
- Wide adaptability with consistent high yield performance
- Very good emergence and seedling vigor for cold soil.
- Works well with not-till, minimum-till, and conventional situations.
- Very good drought and heat tolerance
- Works well across all soil types
- Uniform long girthy ear with good flex and average test weight

SX-609RR VT2PRO RIB

- RM 109-110 day
- **Roundup Ready® 2 Technology**
- Protection from above ground insects
- Outstanding yields with very good test weight and kernel depth
- Excellent early vigor works in no-till and minimum-till
- Excellent roots with very good stalks
- Medium height plant with very good fall intactness
- Super disease package with good GLS and NCLB tolerance

Roundup Ready® Corn 2

SX-320RR

- RM 101-102 day
- **Roundup Ready® 2 Technology**
- Same genetics as SX-319RR VT2PRO above but without the insect protection

SX-610RR

- RM 109-110 day
- **Roundup Ready® 2 Technology**
- Same genetics as SX-609RR VT2PRO above but without the insect protection

2025 PREMIUM SEED CORN

PowerCore® Enlist® Refuge Advance® Corn Hybrids

PowerCore® Enlist® Refuge Advance® Corn Hybrids feature:

- Broad-spectrum above-ground insect control with three distinct modes of action
- Stacked with the Enlist® corn trait
- Builds on glyphosate system with additional tolerance to 2,4-D choline in Enlist® herbicides, glufosinate and FOP herbicides
- Refuge-In-Bag (RIB) solution with 5% refuge, more high yielding corn per acre
- RIB makes refuges simple and convenient
- **Treated with Acceleron®** which includes Poncho for insect protection and four different fungicides to protect against soil and seed-borne diseases

SX-454PC ENLIST RIB

- PowerCore® Enlist®
- RM 105 day
- Roundup®, Liberty®, and Enlist One® herbicide tolerant
- Protection from above ground insects
- Very impressive disease package, including tar spot
- Tremendous health and intactness with strong stalks
- Widely adapted with long girthy ears and high test weight
- Works well in heavy tough soils
- Performs well in no-till and minimum till situations
- Excels in highly productive soils

SmartStax® RIB Compete® Corn Blend Hybrids

SmartStax® RIB Compete® Corn Blend Hybrids feature:

- **Roundup Ready® 2 Technology**
- **LibertyLink® herbicide resistance**
- Refuge-In-Bag (RIB) solution with 5% refuge, more high yielding corn per acre
- RIB makes refuges simple and convenient
- Protection from above ground and below ground insects
- **Treated with Acceleron®** which includes Poncho for insect protection and four different fungicides to protect against soil and seed-borne diseases

SX-584RR STAX RIB

- RM 107 day
- **Roundup Ready® 2 Technology**
- **LibertyLink® herbicide resistance**
- Wide adaptability with consistent high yield performance
- Very good emergence and seedling vigor for cold soil
- Works well with not-till, minimum-till, and conventional situations
- Very good drought and heat tolerance
- Works well across all soil types
- Uniform long girthy ear with good flex and average test weight

2025 PREMIUM SEED CORN

CONVENTIONAL HYBRIDS

SX-152

- RM 95-96 day
- Dominant yield performance for its maturity across all environments
- Very girthy flex ear adapts to moderate planting populations
- Medium statured hybrid with very good roots and stalks with very good standability
- Outstanding grain variety that also works well for silage

SX-239

- RM 101-102 day
- Wide adaptability moves across various soils
- Excellent early vigor for minimum tillage and early planting
- Medium-tall plant with very good stalks and roots
- Long ears with good kernel depth with excellent test weight and yield

SX-495

- RM 105 day
- Medium-tall with above average stalks and roots
- Long ear with excellent flex and big kernels
- Increased health, better on leaf diseases and good late season stay green
- Moderate population will work best as plant has above average ear flex
- Handles stress well, moves across all soil types, and very versatile

SX-523

- RM 106 day
- Wide adaptability with consistent high yield performance
- Very good emergence and seedling vigor for cold soil.
- Works well with not-till, minimum-till, and conventional situations
- Very good drought and heat tolerance
- Works well across all soil types
- Uniform long girthy ear with good flex and average test weight

SX-574

- RM 107-108 day
- High performing hybrid with excellent agronomics
- Very Strong disease package including Goss's Wilt and Tar spot
- Medium long girthy ear with very good grain quality and test weight
- Widely adapted across soil types and works with a wide range of populations

SX-579

- RM 109-110 day
- Outstanding yields!
- Very good test weight and kernel depth
- Excellent early vigor works in no-till and minimum-till
- Excellent roots with very good stalks
- Medium height plant with very good fall intactness
- Super disease package, good GLS and NCLB tolerance

SX-630

- RM 109-110 day
- Shows impressive early growth
- Strong stalk & roots
- Excellent conventional or no-till choice
- Large girthy ears
- Good dry down and staygreen
- Adapts well to various soil types, and excels with high management

Most hybrids can be treated with Poncho® 250.

See page 8 for details.

- Provides seed and seedling protection against all seven major early corn insect pests, up to the 5-leaf stage.
- Contact and systemic activity is a highly effective broad-spectrum insect control.

Always read and follow label directions.

Poncho® is a registered trademark of BASF Corporation.

2024 Conventional Seed Corn Plot Data

Planted 5-22-24, Harvested 10-30-24, Monroeville, Ohio

Poncho 250

- Covers all seven major early corn insect pests, up to the 5-leaf stage.
- Provides seed and seedling protection.
- Contact and systemic activity offers highly effective, broad-spectrum insect control.

Yields 9.7* bu./ac. more than seed not treated with an insecticide

**Based on 526 side-by-side field trials comparing the performance of Poncho 250 treated seed to seed not treated with an insecticide.*

Always read and follow label directions.
Poncho® is a registered trademark of BASF Corporation.

NEW!

A CLOSER LOOK AT THE ENLIST® WEED CONTROL SYSTEM FOR CORN.

2,4-D choline | Glyphosate | Glufosinate | FOP Herbicides

Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use on PowerCore® Enlist® corn crops.

- Convenient proprietary blend of 2,4-D choline and glyphosate
- The two sites of action work together to deliver control of yield-robbing weeds and help prevent resistance

On-Target Application

- 90% less drift than traditional 2,4-D
- 96% less volatile than 2,4-D ester

- Straight-goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with Liberty® herbicide and other qualified tank-mix products, allowing for a customized weed control program to fit each farm

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all applicable regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS.

B.t. products may not yet be registered in all states. Check with your seed brand representative for the registration status in your state.

IMPORTANT IRM INFORMATION: Certain products are sold as RIB Complete® corn blend products, and do not require the planting of a structured refuge **except** in the Cotton-Growing Area where corn earworm is a significant pest. Products sold without refuge in the bag (non-RIB Complete) require the planting of a structured refuge. **See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.**

Roundup Ready® Technology contains genes that confer tolerance to glyphosate. Roundup Ready® 2 Technology contains genes that confer tolerance to glyphosate. Plants that are not tolerant to glyphosate may be damaged or killed if exposed to those herbicides. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association. Acceleron®, RIB Complete®, Roundup Ready 2 Technology and Design®, Roundup Ready®, SmartStax®, and VT Double PRO® are trademarks of Bayer Group

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, **including applicable refuge requirements for insect resistance management**, for the biotechnology traits expressed in the seed as set forth in the Technology/Stewardship Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation and agreement to comply with the most recent stewardship requirements.

Seeds containing the PowerCore® Enlist®, PowerCore® Enlist® Refuge Advanced®, and Enlist® Corn - REFUGE traits are protected under one or more U.S. patents which can be found at: www.traitstewardship.com. The purchase of this traited seed includes a limited license to produce a single crop in the United States. The use of seed from such a crop and/or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Corteva Agriscience Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements.

To plant PowerCore Enlist, PowerCore Enlist Refuge Advanced, and Enlist Corn - REFUGE seed, you must have a limited license from Corteva Agriscience (or other appropriate affiliates). In consideration of the foregoing, Corteva Agriscience grants to the Grower a limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed.

IRM - Properly managing trait technology is key to preserving it as a long term crop protection tool. Growers who fail to comply with IRM requirements risk losing access to this product. To help preserve the effectiveness of B.t. corn technologies, growers planting B.t. corn technologies are required to follow an IRM Plan. Consult the Corn Product Use Guide for appropriate refuge configuration options. Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology Use Agreement and Product Use Guide. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements. For complete details on IRM requirements for hybrids with Bt technology, including refuge examples and important information on the use of insecticides on refuge and Bt corn acres, please consult appropriate Product Use Guide. Go to www.corteva.us/Resources/trait-stewardship.html to download the latest Corteva Agriscience Corn Product Use Guide.

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, Corteva Agriscience's product launch process for responsible launches of new products includes a long-standing process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control

to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com. Excellence Through Stewardship® is a registered trademark of Global Stewardship Group.

Following burndown, Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist® corn and soybeans. Consult Enlist® herbicide labels for weed species controlled. Enlist Duo and Enlist One herbicides are not registered for use or sale in all states and counties; are not registered in AK, CA, CT, HI, ID, MA, ME, MT, NH, NV, OR, RI, UT, VT, WA and WY; and have additional subcounty restrictions in AL, GA, TN and TX, while existing county restrictions still remain in FL. All users must check "Bulletins Live! Two" no earlier than six months before using Enlist One or Enlist Duo. To obtain "Bulletins," consult epa.gov/esp/, call 1-844-447-3813, or email ESPP@epa.gov. You must use the "Bulletin" valid for the month and state and county in which Enlist One or Enlist Duo are being applied. Contact your state pesticide regulatory agency if you have questions about the registration status of Enlist® herbicides in your area. **ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO USE ANY PESTICIDE PRODUCT OTHER THAN IN ACCORDANCE WITH ITS LABELING. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USE IN THE STATE OF APPLICATION. USE OF PESTICIDE PRODUCTS, INCLUDING, WITHOUT LIMITATION, 2,4-D-CONTAINING PRODUCTS NOT AUTHORIZED FOR USE WITH ENLIST CORN AND SOYBEANS, MAY RESULT IN OFF-TARGET DAMAGE TO SENSITIVE CROPS/AREAS AND/OR SUSCEPTIBLE PLANTS, IN ADDITION TO CIVIL AND/OR CRIMINAL PENALTIES.** Additional product-specific stewardship requirements for Enlist crops, including the Enlist Product Use Guide, can be found at www.traitstewardship.com. POWERCORE® is a registered trademark of Bayer Group. POWERCORE® multi-event technology developed by Corteva Agriscience and Bayer Group. Liberty®, LibertyLink® and the Water Droplet Design are registered trademarks of BASF. ®Roundup and Roundup Ready are registered trademarks of Bayer Group. Always follow IRM, grain marketing and all other stewardship practices and pesticide label directions. B.t. products may not yet be registered in all states. Check with your seed representative for the registration status in your state.
