(419) 359-1501

ENLIST E3[®] SOYBEANS

New technology with tolerance to 2,4-D choline, glyphosate and Liberty herbicides. This gives you more ways to fight weeds and protect yields in-season. We are offering one new variety this year for a total of four varieties. Descriptions are enclosed. All can be treated with Eclipse[®] Seed Treatment.

GLYPHOSATE TOLERANT SOYBEANS

We continue to offer the 3106GT and its description is enclosed. Can be treated with Eclipse[®] Seed Treatment.

LIBERTYLINK[®] GT27[®] SOYBEANS

This exciting trait stack enables the use of Liberty, glyphosate and Alite 27 (a new HPPD Inhibitor) over the top. We are offering three varieties this year. Descriptions of all varieties are enclosed. All can be treated with Eclipse[®] Seed Treatment.

XTENDFLEX[®] SOYBEANS

This technology provides dicamba, glyphosate and glufosinate resistance and is built upon the high yielding Roundup Ready 2 Yield[®] trait. We offer one variety this year, a 3.0 RM with variety characteristics enclosed. This can be treated with Eclipse[®] Seed Treatment.

CERTIFIED WYANDOT 14 SOYBEANS

are available and a description is enclosed.

ECLIPSE US[™] TRIO-R IM 75 SOYBEAN TREATMENT

This seed treatment is offered on all varieties of soybeans. It includes three fungicides: Rancona, Thiabendazole, and Metalaxyl along with the insecticide Imidacloprid. This provides protections from both seed and soil-borne pathogens and insects. This treatment is an additional \$10.25/unit which must be prepaid and is NOT returnable. **Must be ordered by 2-25-23.**

Tillage Parts - The next shipment order deadline is February 27, 2023 on Wiese tillage parts. Some Current Prices*

2.5" HD Straight Plow Chisels (20" / 12#)	\$57.56	20" x 7ga Disc Blades	\$41.78
3" Twisted Plow Chisels (1/2" x 3" x 23")	\$30.19	20"x 11/2"R Soil Saver Coulter Blades (6 ga, 0.197" Thick)	\$40.17
4" Twisted Plow Chisels (1/2" x 4" x 26").....	\$31.07	20"x 11/2"R Soil Saver Coulter Blades (5 ga, 0.236" Thick).....	\$48.22
7" x 1/4" Field Cultivator Sweeps JD & IH	\$ 9.46	20" x 6 mm Vortex Coulter (Vertical Tillage Blade)	\$63.51
9" x 1/4" Field Cultivator Sweeps JD & IH	\$10.14	Poly Shank Protectors (white, yellow add 10¢).....	\$ 2.50
2.75" x 5/16" Danish for Kongskilde	\$ 6.92	16" x 0.177" x 13 Wave Coulter for JD 7000 & Newer	\$35.42
7" x 5/16" Nichols Style Noc-on	\$12.03	17" x 13 Wave Coulter for Yetter, GP & others	\$37.03
9" x 5/16" Nichols Style Noc-on	\$13.57		

Replacement Fertilizer & Seed Opener Blades:

18" Single disc opener blade: fits JD 750,1590,1690,1890,1990...	\$30.71
18.5" x 0.197" Oversized JD single disc opener blade	\$34.21
Many other blades are available	CALL FOR PRICES

Planter Graphite & Talc:

40# White Talc bag.....	\$52.90
1# Graphite bottle.....	\$6.20
5# Graphite bucket.....	\$18.52
80/20 talc/graphite (40#).....	\$54.63

* Prices subject to change. Due to shortages all parts are subject to availability. Call for more information and current prices.

Enlist E3[®] Soybeans

The advanced technology of the Enlist[®] weed control system is now available for soybeans. With tolerance to 2,4-D choline in Enlist herbicides, glyphosate and glufosinate, Enlist E3[®] soybeans give you more ways to fight weeds and protect yields this season. The Enlist E3 trait stack has the following herbicide tolerances built in:

- Glyphosate (Roundup[®]) tolerant
- Glufosinate (Liberty[®]) tolerant
- 2,4-D Choline (Enlist One[®] & Enlist Duo[®]) tolerant

New!

E2623E3

ALMOST SOLD OUT!

- 2.6 RM
- Enlist E3[®] trait stack allows great herbicide flexibility
- Tan/light tawny plant with medium-tall height
- Excellent ability to handle stress and disease issues
- Rps1k gene plus very good field Phytophthora tolerance
- Superior yields in all row widths for its maturity across all environments
- Early maturity allows wheat planting

E2921E3

- 2.9 RM
- Enlist E3[®] trait stack allows great herbicide flexibility
- Gray/brown plant with medium height
- Above average standability scores
- Rps 1a with very good Phytophthora tolerance

E3121E3

- 3.1 RM
- Enlist E3[®] trait stack allows great herbicide flexibility
- Gray/brown plant with medium-tall height
- Rps 1c with Excellent Phytophthora tolerance
- Outstanding yields, best yielding variety in the 3.1 RM across multiple tests and years

E3422E3

LIMITED

- 3.4 RM
- Tan/brown plant that is medium-tall with excellent lodging scores
- Outstanding disease package with excellent SDS, Rps 1k gene and excellent Phytophthora field tolerance
- Handles heavy soils well, excels on productive soils
- Perfect balance of defensive traits and yield, plot topper!

A CLOSER LOOK AT THE ENLIST[®] WEED CONTROL SYSTEM

2,4-D choline | Glyphosate | Glufosinate

Following burndown, Enlist Duo[®] and Enlist One[®] herbicides with Colex-D[®] technology are the only herbicides containing 2,4-D that are labeled for preemergence and postemergence use with Enlist E3[®] soybeans.

On-Target Application

- 90% less drift than traditional 2,4-D
- 96% less volatile than 2,4-D ester

- Convenient proprietary blend of 2,4-D choline and glyphosate
- The two modes of action work together to deliver control of yield-robbing weeds and help prevent resistance

- Straight goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with Durango[®] DMA[®] herbicide, Liberty[®] herbicide and other qualified tank-mix products, allowing for a customized weed control program to fit each farm

Seeds containing the Enlist, Herculex and PowerCore traits are protected under one or more U.S. patents which can be found at: www.traitstewardship.com. The purchase of these seed traits include a limited license to produce a single crop in the United States. The use of seed from such a crop or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Corteva Agriscience Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements.

To plant Enlist, Herculex and PowerCore seed, you must have a limited license from Corteva Agriscience (or other appropriate affiliates). In consideration of the foregoing, Corteva Agriscience grants to the Grower the limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed.

Always read and follow herbicide label directions prior to use: Enlist[®] products contain the Enlist trait that provides crop safety for use of labeled over-the-top applications of glyphosate, glufosinate and 2,4-D herbicides featuring Colex-D[®] technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist[®] crops are products that feature Colex-D technology and are expressly labeled for use on Enlist crops. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunction with Enlist products. Enlist corn contains genes that confer tolerance to 2,4-D and

-fop herbicides. 2,4-D and -fop herbicides will damage or kill crops that are not tolerant to 2,4-D or -fops.

Enlist E3[®] soybean seeds containing the Enlist[®] trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3[®] soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist[®] Soybean Product Use Guide. U.S. patents for Dow AgroSciences technologies can be found at the following webpage: www.corteva.us/Resources/trait-stewardship.html.

Corteva Agriscience is a member of Excellence Through Stewardship[®] (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, our product launch process for responsible launches of new products includes a longstanding process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and endusers must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com.

The transgenic soybean event in Enlist E3[®] soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies, L.L.C. Excellence Through Stewardship[®] is a registered trademark of Excellence Through Stewardship.

LibertyLink® GT27® Soybeans

Created with high-yielding elite genetics, LibertyLink® GT27® soybeans give growers exceptional performance coupled with outstanding weed control. LibertyLink GT27 soybeans were the first soybean technology enabling Liberty®, glyphosate, and Alite 27 (a new HPPD Inhibitor) use over the top.

2026LLGT

- 2.6 RM
- Early with good yield potential
- Excellent emergence, stress tolerance and vigor
- Medium-tall plant height with light tawny color
- Very good Phytophthora field tolerance
- Very good Sudden Death Syndrome tolerance
- Works well in no-till, reduced till and conventional situations in broad range of soils

2231LLGT

- 3.1 RM
- Top yields across all soil types and tillage applications
- Attractive light tawny, medium-tall plant
- Very good standability
- Rps H1K gene with very good Phytophthora field tolerance

2029LLGT

- 2.9 RM
- Outstanding yield for its maturity
- Attractive light tan plant with good height and standability
- Above average Sudden Death Syndrome scores with Brown Stem Rot resistance
- Excellent Phytophthora resistance
- Moves across various soil types well

LibertyLink GT27 is not tolerant to all HPPD herbicides. Alite™27 herbicide from BASF is the first HPPD herbicide for use on GT27 and LibertyLink GT27 soybeans is currently available in select counties in certain states.

Seeds containing the LibertyLink® trait may be protected under one or more U.S. patents and may be planted only to produce one (1) commercial crop in a single season, and only after signing a BASF Grower Technology Agreement. It is illegal to save seeds containing the LibertyLink trait for use as planting seed or for transfer to others for use as planting seed.

LibertyLink® GT27® soybeans offer triple stack tolerance to Liberty, glyphosate, and, in select counties specified on the label, the first HPPD based herbicide for soybeans—Alite™ 27. Other HPPD herbicides not labeled for use with LibertyLink GT27 or isoxaflutole-resistant soybeans may cause significant crop injury. Alite 27 herbicide is only available for use in labeled counties.

Always read and follow label directions. Alite 27 is a restricted use herbicide. Alite, Liberty, and LibertyLink are registered trademarks of BASF. GT27 is a registered trademark of M.S. Technologies, L.L.C. MS Technologies is a trademark of M.S. Technologies, L.L.C. ©2020 BASF Corporation / M.S. Technologies, L.L.C. All Rights Reserved. APN 20-INT-0014

XtendFlex® Soybeans

XtendFlex® Soybean Varieties feature these benefits:

- Provide tolerance to dicamba (Xtendimax®), glyphosate (Roundup®), and glufosinate (Liberty®)
- Built on the high-yielding Roundup Ready 2 Yield® trait

3022XF

- 3.0 RM
- Medium-tall height with medium bush and very good standability
- Carries the Rps 3a gene for Phytophthora with above average field tolerance
- Works well in all row widths, excellent no-till choice
- Excellent no-till choice
- Outstanding emergence and early vigor
- Solid agronomics with good disease ratings
- Yields with varieties 2-3 days later

Glyphosate Tolerant Soybeans

3106GT

- 3.1RM
- Tall plant type with excellent standability
- Excellent tolerance to Phytophthora root rot, contains Rps 1c
- Excellent seedling vigor for minimum till and no-till situations
- Works well in all row widths
- Handles heavy wet soil conditions

Conventional Soybeans

WYANDOT 14

- 2.9 RM
- Seed size, protein and oil content greater than Wyandot
- 2012 release of The Ohio State University
- Resistant to soybean aphids (Rag 2 Gene) and Powdery Mildew.
- Intermediate type plant
- Very good yield potential with good yield record
- Acceptable for the soy food market because of the lack of hilum pigments
- Resistance to Phytophthora with the Rps3a gene
- White flowers, gray pubescence, brown pods and yellow (clear) hila
- Superior or equal agronomic attributes to Wyandot

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex® Technology. ONLY USE FORMULATIONS

THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend® soybeans or products with XtendFlex® Technology.

Products with XtendFlex® Technology contains genes that confer tolerance to glyphosate, glufosinate and dicamba. Glyphosate will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Glufosinate will kill crops that are not tolerant to glufosinate. Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weed control programs.

Roundup Ready 2 Yield® and XtendFlex® are registered trademarks of Bayer Group. LibertyLink® and the Water Droplet Design® is a trademark of BASF Corporation. ©2022 Bayer Group. All rights reserved.

Wensink Premium Seed Corn

“All the Performance at Half the Price”

2023 Winter Seed Corn Program

Early Order Seed Corn Program has begun and **will end March 1, 2023**. See the chart below and the enclosed hybrid descriptions. These are some exciting hybrids that have top end yield potential across a wide range of conditions. Some varieties are limited, so order early for best selection. All orders will be filled on a first placed, first filled system.

We are now offering an **Early Order Discount of \$57.00 off per unit** from the in-season list price. There is also a **Volume Discount of up to \$7.00 per unit** available.

Units	Discounts		YOUR COST* TRADITIONAL VARIETY Order by 3/1/2023
	Volume	Early Order	Pay on Pickup*
1 - 24	-	\$57.00	\$96.00
25 - 49	\$2.00	\$57.00	\$94.00
50 - 99	\$4.00	\$57.00	\$92.00
100 - 149	\$5.00	\$57.00	\$91.00
150 - 199	\$6.00	\$57.00	\$90.00
200 +	\$7.00	\$57.00	\$89.00

Order early for best seed size and hybrid selection. If you have questions, give us a call at (419) 359-1501.

Pickup Date: March 2023. All hybrids have 80,000 kernels per unit.

*Prices are subject to change and hybrid selection is dependent upon availability, so order early for best selection.

Above price is for SX-630. See Quick Facts page for pricing for all other varieties.

Any corn not picked up by May 1, 2023, even if it is paid for, may be put back into inventory and made available for sale.

SmartStax® RIB Complete® Corn Blend - This technology provides control of the absolute broadest spectrum of above and below ground insects and herbicide tolerance (Roundup Ready® and LibertyLink®). These hybrids come treated with Acceleron® Seed Treatment. Refuge-In-Bag makes planting simple and convenient with no separate structured refuge required. This is the most advanced trait platform delivering all-in-one crop protection. The **SX-580RRSTAX RIB**, a 107 day powerhouse has new genetics and super yields in corn back to corn situations.

VT Double Pro® RIB Complete® Corn Blend - This provides protection from above ground insects and is Roundup Ready®. Above ground insects include Corn Ear Worm, Fall Army Worm, European and Southwestern Corn Borer. These hybrids come treated with Acceleron® Seed Treatment. Refuge-In-Bag makes planting simple and convenient with no separate structured refuge required. We are offering four hybrids at this time: The **SX-319RR VT2PRO RIB** a 102 day short season hybrid, **SX-479RR VT2PRO RIB** a 105 day workhorse, the NEW 107 day **SX-553RR VT2PRO RIB**, and the very popular **SX-609RR VT2PRO RIB** a 109 day plot topper.

2023 PREMIUM SEED CORN

CONVENTIONAL HYBRIDS

SX-152

- RM 95-96 day
- Dominant yield performance for its maturity across all environments
- Very girthy flex ear adapts to moderate planting populations
- Medium statured hybrid with very good roots and stalks with very good standability
- Outstanding grain variety that also works well for silage

SX-239

- RM 101-102 day
- Wide adaptability moves across various soils
- Excellent early vigor for minimum tillage and early planting
- Medium-tall plant with very good stalks and roots
- Long ears with good kernel depth with excellent test weight and yield

SX-490

LIMITED

- RM 105 day
- Medium-tall hybrid with strong stalks and roots
- Flex ear with excellent girth (16-18 Kernel Rows)
- Impressive disease tolerance
- Outstanding yield potential with very good dry down
- Works well on heavy tough soils.

SX-523

- RM 106 day
- Wide adaptability with consistent high yield performance
- Very good emergence and seedling vigor for cold soil.
- Works well with not-till, minimum-till, and conventional situations.
- Very good drought and heat tolerance
- Works well across all soil types
- Uniform long girthy ear with good flex and average test weight

SX-542

- RM 106 day
- Wide adaptability with consistent high yield performance
- Works in all soil types from high fertility to wet clay
- Very good root and stalk ratings
- Semi-flex ear with medium girth and excellent test weight
- Works well with conventional and no-till situations

SX-570

- RM 107-108 day
- Exceptional top-end yield potential
- Strong emergence and fast early season growth for both conventional and no-till
- Consistent, girthy ears with deep kernels and good test weight.
- Balanced disease package with very good scores for Gray Leaf Spot and Northern Leaf Blight.

SX-579

- RM 109-110 day
- Outstanding yields!
- Very good test weight and kernel depth
- Excellent early vigor works in no-till and minimum-till
- Excellent roots with very good stalks
- Medium height plant with very good fall intactness
- Super disease package, good GLS and NCLB tolerance

SX-630

- RM 109-110 day
- Shows impressive early growth
- Strong stalk & roots
- Excellent conventional or no-till choice
- Large girthy ears
- Good dry down and staygreen
- Adapts well to various soil types, and excels with high management

2022 Conventional Seed Corn Plot Data

Planted 5-18-22, Harvested 11-1-22, Monroeville, Ohio

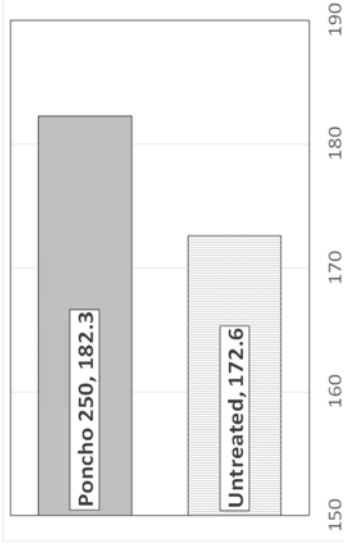

Poncho 250

- Covers all seven major early corn insect pests, up to the 5-leaf stage.
- Provides seed and seedling protection.
- Contact and systemic activity offers highly effective, broad-spectrum insect control.

Yields 9.7* bu./ac. more than seed not treated with an insecticide

*Based on 526 side-by-side field trials comparing the performance of Poncho 250 treated seed to seed not treated with an insecticide.

Always read and follow label directions. Poncho® is a registered trademark of BASF Corporation.

2023 PREMIUM SEED CORN

VT Double Pro® RIB Complete® Corn Blend Hybrids

All VT Double Pro® RIB Complete® Corn Blend Hybrids feature:

- Roundup Ready® 2 Technology
- Roundup Ready® flexibility and protection from above ground insects, including Corn Ear Worm, Fall Army Worm, European and SW Corn Borer
- Refuge-In-Bag (RIB) makes refuges simple and convenient
- **All hybrids come treated with Acceleron®** which includes Poncho for insect protection and four different fungicides to protect against soil and seed-borne diseases

SX-319RR VT2PRO RIB

- RM 101-102 day
- **Roundup Ready® 2 Technology**
- Protection from above ground insects
- Wide adaptability moves across various soils
- Excellent early vigor for minimum tillage and early planting
- Medium-tall plant with very good stalks and roots
- Long ears with good kernel depth with excellent test weight and yield

SX-479RR VT2PRO RIB

- RM 105 day
- **Roundup Ready® 2 Technology**
- Protection from above ground insects
- Medium-tall hybrid with strong stalks and roots
- Flex-ear with excellent girth (16-18 Kernel Rows)
- Impressive disease tolerance
- Outstanding yield potential with very good dry down
- Works well on heavy tough soils

SX-553RR VT2PRO RIB

- RM 107 day
- **Roundup Ready® 2 Technology**
- Protection from above ground insects
- Wide adaptability with consistent high yield performance
- Very good emergence and seedling vigor for cold soil.
- Works well with not-till, minimum-till, and conventional situations.
- Very good drought and heat tolerance
- Works well across all soil types
- Uniform long girthy ear with good flex and average test weight

SX-609RR VT2PRO RIB

- RM 109-110 day
- **Roundup Ready® 2 Technology**
- Protection from above ground insects
- Outstanding yields with very good test weight and kernel depth
- Excellent early vigor works in no-till and minimum-till
- Excellent roots with very good stalks
- Medium height plant with very good fall intactness
- Super disease package with good GLS and NCLB tolerance

2023 PREMIUM HYBRID SEED CORN

SmartStax® RIB Complete® Corn Blend Hybrids feature:

- Roundup Ready® 2 Technology
- LibertyLink® herbicide resistance
- Refuge-In-Bag (RIB) solution with 5% refuge, more high yielding corn per acre
- RIB makes refuges simple and convenient
- Protection from above ground and below ground insects
- Treated with Acceleron® which includes Poncho for insect protection and four different fungicides to protect against soil and seed-borne diseases

SX-580RR STAX RIB

- RM 107 day
- Roundup Ready® 2 Technology
- LibertyLink® herbicide resistance
- Widely adapted to various soil types
- Excellent cross-pollinations
- Works in soil types from high fertility to wet clay
- Medium plant height with semi-flex ear
- Very good root and stalk ratings
- Attractive fall appearance
- Excellent test weight

Roundup Ready® Corn 2

SX-320RR **VERY LIMITED**

- RM 101-102 day
- Roundup Ready® 2 Technology
- Wide adaptability moves across various soils
- Excellent early vigor for minimum tillage and early planting
- Medium-tall plant with very good stalks and roots
- Long ears with good kernel depth with excellent test weight and yield
- Treated with Acceleron® which includes Poncho for insect protection and four different fungicides to protect against soil and seed-borne diseases

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. B.t. products may not yet be registered in all states. Check with your seed brand representative for the registration status in your state.

IMPORTANT IRM INFORMATION: RIB Complete® corn blend products do not require the planting of a structured refuge **except** in the Cotton-Growing Area where corn earworm is a significant pest. **See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.**

Roundup Ready® 2 Technology contains genes that confer tolerance to glyphosate. **Glyphosate** will kill crops that are not tolerant to glyphosate. Herculex® is a registered trademark of Dow AgroSciences LLC. LibertyLink® and the Water Droplet Design® is a trademark of BASF Corporation. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association. Acceleron®, RIB Complete®, Roundup Ready 2 Technology and Design™, Roundup Ready®, SmartStax®, and VT Double PRO® are trademarks of Bayer Group.

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, **including applicable refuge requirements for insect resistance management**, for the biotechnology traits expressed in the seed as set forth in the Technology/Stewardship Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation and agreement to comply with the most recent stewardship requirements.

2022 GMO Seed Corn Test Plot Data

Planted 5-18-22, Harvested 11-1-22, Monroeville, Ohio

VT Double PRO® RIB Complete® Corn Blend

Above Ground Protection, Single Bag Convenience

MODES OF ACTION COMPARISON CHART

	VT Double PRO® RIB Complete® Corn Blend	Herculex® 1	Optimum® AcreMax®
PRIMARY PESTS			
European corn borer	**	*	**
Southwestern corn borer	**	*	**
Fall armyworm	**	*	*
Corn earworm	**		
Black cutworm		*	*

Two ways to control earworm
 Blend of 95% traited, 5% refuge seed means no separate, structured refuge required in the Corn-Growing Area
 The truly simple refuge-in-a-bag solution: just fill your planter and go

** Dual-mode activity * Single-mode activity

Three kernels damaged per ear can equal one bushel lost per acre
